

Daniel Barok, Consultant for International Collaborations and Business Development

Talk title: Israel in Space (almost) 3 decades

Short bio:

Daniel is deeply involved in the Israeli Space Sector in detailed familiarity with advanced technologies as well as Startup incubators, Venture Capitals, Academic Institutions, BI-National R&D funds etc.

During 2012- 2017 Daniel served as an Adviser for International Collaborations in the Israel Space Agency (ISA). Prior to joining ISA (2006-2012), Daniel served in the Israeli Space Industry as Director for International Marketing and Business Development (ImageSat International and later, in ELBIT Systems – Electro-Optics- ELOP) as well as a consultant for Israeli Space related companies with emphasis on new-space startups: Business Development, Business Planning & Sales Strategy.

Daniel served 25 years (1980 -2005) in the Israel Defense Forces (IDF) and among his duties commanded an Imagery Analysis Squadron. In his last position (2000-2005)

Daniel was responsible for the establishment and implementation of the operational capabilities of the National Space Assets as well as Commercial Remote Sensing systems. In this position, Daniel led the technological unit of the National Geo-Spatial Intelligence Agency and its dedicated R&D teams.

Daniel holds MBA and B.Sc. in Mechanical Engineering, both from Ben Gurion University (BGU).
