

November 6-8, 2023 David Intercontinental Hotel Tel Aviv Israel

Advances in Broadband and Multiband Antennas

Meisong Tong

The session focuses on the development and advances of the broadband and multiband antennas. All papers addressing the new methods or techniques for enhancing the performances, lowering the cost, and reducing the size of the broadband and multiband antennas are welcome. The session also welcomes the papers about the new advances in modeling, simulating, optimizing, and analyzing the broadband and multiband antennas.
